

ARVIND KUMAR YADAV

Software Developer

✉ arvindyadav70075@gmail.com |  LinkedIn |  GitHub | 📞 +91-9140130314 | 📍 Kanpur, India

CAREER OBJECTIVE

BCA student with hands-on experience in full-stack web development, mobile applications, and blockchain solutions. Focused on building scalable, user-centric digital products and addressing real-world challenges through technology. Seeking an entry-level Software Developer role to apply technical expertise in innovative projects while continuously enhancing professional capabilities.

TECHNICAL SKILLS

Programming Languages: JavaScript, Solidity
Web Development: HTML, CSS, JavaScript, React.js, Next.js, Express.js, MySQL
Mobile Development: React Native, Supabase
AI & Generative AI: LLMs, RAG, Vector Embeddings, Vector Databases, MCP, Prompt Engineering, LLM APIs
Blockchain: Solidity, Truffle, Web3.js, Metamask
DevOps & Tools: Git, GitHub, Docker, AWS (EC2, S3, Lambda), Terraform, Kubernetes
Frameworks & Libraries: Tailwind CSS, Bootstrap

WORK EXPERIENCE

Software Developer Jun 2026 – Present
Webguard Info Solutions, Kanpur, India

- Develop responsive web applications and mobile applications using React.js, Next.js, React Native, and modern frontend technologies.
- Build user-friendly interfaces with reusable components, responsive layouts, API integration, and cross-browser compatibility.
- Collaborate with development teams to implement application features, debug issues, and improve application functionality and user experience.

Freelance Software Developer 2024 – Present
Self-Employed, Remote

- Delivered 30+ web and mobile projects for clients across e-commerce, business, and portfolio domains, building solutions with React.js, Next.js, React Native, and MySQL.
- Managed complete project lifecycle independently, from requirement gathering and UI/UX design to development, deployment, and post-launch support, maintaining strong client retention.
- Delivered client projects on schedule while balancing full-time academic and professional commitments, strengthening skills in time management and independent problem-solving.

Web Development Trainer Jan 2026 – Mar 2026
Online Training Program

- Trained international students in full-stack web development through a 2-month online training program covering HTML, CSS, JavaScript, React.js, and modern web technologies.
- Mentored students on frontend development best practices, debugging techniques, and project deployment workflows.

Mobile App Developer Intern Jun 2025 – Jul 2025
Cosine Theta, Kenya (Remote)

- Built 3 core mobile modules using React Native with 100+ active users within the first month.
- Integrated Supabase authentication and real-time database, reducing login errors by 15% and enabling live data sync.
- Collaborated with remote team to resolve 10+ critical bugs, enhancing overall app stability and user experience.

PROJECTS

Project 1: FacultyJobs - Recruitment Platform

- Developed responsive frontend for a full-stack faculty recruitment platform using React.js, Vite, and Tailwind CSS, collaborating with backend developers to integrate and validate API-driven workflows.
- Built and maintained multiple production portals including Public Website, Candidate Portal, Institute Portal, and Admin Panel, implementing responsive dashboards, job management, candidate profiles, applications, recruitment workflows, and payment interfaces.
- Integrated REST API endpoints across authentication, candidate profiles, AI resume parsing, job recommendations, applications, application status tracking, recruitment workflows, resume/document management, payments, and invoices while preserving existing backend functionality.
- Collaborated with the development team using Git and GitHub for branch-based development, code collaboration, testing, debugging, and feature integration, validated the multi-portal application using Docker-based environments and production-oriented testing workflows.
- **Live:** <https://facultyjobs.org/>

Project 2: Perfect Pizza - Food Delivery Platform

Freelance Project

- Developed a production-ready food delivery ecosystem using Flutter and Firebase, enabling customers to browse menus, customize products and combos, manage carts, place orders, apply offers, and track order status.
- Built responsive Admin and Branch Manager panels for restaurant management, including menu and combo management, coupons and offers, delivery-radius and distance-based delivery charges, GST configuration, reward points, table bookings, and order management.
- Implemented Firebase Authentication, Firestore, real-time order updates, location-based delivery calculations, role-based access, and scalable restaurant/branch-specific data management.
- **Live App:** Google Play Store

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Allenhouse Business School, Kanpur, Uttar Pradesh

ACHIEVEMENTS

- Winner – Inter-college Hackathon: Led team of 4 to deliver campus navigation app prototype within 24 hours, securing first place among 15 competing groups.
- First Runner-up – C Graphics Competition: Demonstrated efficient coding and algorithmic skills, ranking second among 30 participants by creating interactive 2D game.
- Third Runner-up – National Hackathon (CSJMU 2026): Competed with 100+ students from premier institutes delivering waste management system solution in 36 hours.

EXTRACURRICULAR ACTIVITIES

Secretary – Indian Data Club

2025 - 2026

Allenhouse Business School, Kanpur

- Led core technical team of 15+ members organizing 5 workshops and 2 hackathons, reaching over 500 students campus-wide and increasing club membership by 40%.
- Coordinated collaboration between faculty, students, and 5 industry speakers for guest lectures and networking sessions, enhancing industry exposure.
- Mentored 20+ junior students in web development, Git workflows, and project best practices through weekly sessions, with 3 mentees winning local hackathons.
